

**10MCOD**  
**CAT 2 Part 1: Coding Component**

	<b>Not Shown</b>	<b>Below Level</b>	<b>At Level</b>	<b>Above Level</b>
<b>Functionality</b>	Program not submitted.	Program has bugs or does not function correctly.	Program displays questions, accepts user input, and processes input correctly.	Program accounts for unexpected input gracefully.
<b>Complexity</b>	Program not submitted.	Program does not use all three of functions, lists, and for loops correctly.	Program uses functions, lists, and for loops correctly.	Program finds more efficient solutions through the use of functions, lists, and for loops, such as multi-dimensional lists.
<b>Design</b>	Program not submitted.	Program does not accomplish the intended goal laid out in the assignment.	Program follows the proposed algorithm directly.	Program adds additional features to make the task more fun, interesting, or unique.
<b>Commenting</b>	Program is not commented.	Program is missing important comments or comments do not clarify the code.	Program is commented in appropriate places with reasonable clarity.	Program is commented appropriately in a very clear and concise manner.
<b>Bonus</b>				Program features more advanced skills not taught in class (e.g. file I/O, pictures, measuring time, etc.)
